this game is great if you hate fun.. That's game is a little bit strange, the idea isn't as bad as I thought but the game is too minimal. After 10 minutes you don't know what to do and in game you can't regulate the audio. However, it's ok, I buy it just because it costs 1.99\$ and if you are bored you can play it, if you have 'nothing' else to do..

D.. \udb40\udc21. It has to be worth the sale price of \$1.69 right? No. The concept is worthy, but there is no content to back it up. Would revisit if there was more added.. I usually don't like to write negative reviews, but this is a special something:

\*) \u2665\u2665\u2665\u2665\u2665\u2665 controls

\*) no content

\*) insulting interface

This game\u2665\u2665\u2665\u2665\u2665\u2665the survival genre.. If you liked other survival games such as Don't Starve, I recommend getting this game. It'll really make you appreciate those games.. You know that thing you get in 3d games where you have a detailed object with crisp textures laying on a blobbish texel smear of some large-scale background? This is that, in a 2D game. Every sprite has a different DPI on screen, it feels like.

Also the text apparently only looked good on the original testing resolution; it scales badly.

Retro or "low-quality" art is fine, just see Undertale or Nidhogg. The random inconsistency is what kills it.

The controls are kinda sticky, at least in switching to movement to the right.

I didn't get much past the stew, but other reviews seem to indicate that I've already seen about half the game. Short games are fine, but...

The writing is also slightly off. Not bad-bad, but if you're putting something up for sale... try to get someone with at least a slight college level experience in proofing and copyediting to go over it -- someone who didn't write it. Given the amount of text between the game, the website, and Steam itself, I'd guess that's maybe a half hour's work.

The less text you have the more important it is to get it right.

All in all it looks like a good first finished game project from a new dev, but I just keep asking myself, why is it on Steam?. Fun but still needs work.

3/5. DO NOT BUY.

Game length is seriously 3 min gameplay time. I'm not joking.

This game pretends to have a story and acts like a survival game. But actually it has none of them.

Since the game has only 3 quests and which can be beat in 3 min,

the hunger system is totally useless. you beat the 3 quests and the game is over.

\*Clap Clap. I usually am able to see a game's true aspect (sucked game or not sucked game) through trailer and description.

I failed this time.

Well played.

Fun game. Quite short once you get used to the mechanics and could use more content but well worth the price,
