Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7

Processor: Intel Core i5-4590/AMD FX 8350 equi

English

vr hero sentry

Takes a while to get used to the difficulty but is a very nice take on the castle defence game Pros: -Two heroes with two different classes makes for different gameplay -Fun bosses makes up for the wave feeling -A lot of level skills and item customization -Good video customization Cons: -Somewhat steep learning curve -The maps could be bigger and more of them. I just bought the game and I instantly fell in love with it. There are several classes and builds for diversity, you can level up and customise which creates the feel of diversity.. Nice customization! Great with something more than just bow and arrow Iu2019ve been through quite a few Bow and Arrows in VR, especially from the early generation of VR - Quivr and The Labs

own being my favorite. However, iu2019ve always missed some progression in those games other than just creep progression. At least this game gives me something to work with (other than also an opportunity to play as a wizard); you can buy all kinds ofu2665u2665u2665u2665u2665that will improve either your damage, spells (yeah, itu2019s got that too!), HP or mana. Thatu2019s cool - and it leads to me being able to try out different styles and strategies, which is nice. I would however like more of an interactive userface for purchasing. The beauty of VR to me is in making that sort of experiences (buying and upgrading your stuff) interactive.

German and Russian now available! : German and Russian translations of the game are now available. You can select which language you want when you launch the game from inside steam. Not that this announcement really helps the people who speak Russian and German. I should probably have got this announcement translated too.. Achievements Now Available! : Achievements are now available in Incandescent! More can be added later on, but for now the challenge has been set to get all these ones.. 6120 Grid Cartographer 4 Druid Trendpoker 3D: Texas Hold'em Poker Cartoonway : Mini Cars aMAZE Gears Final Bravely Incandescent Incandescent 2 Out Now! : Incandescent 2 is now available: For those that have the original game you can save with the Crabbo Games Bundle:. Trading Cards Now Available! : The Incandescent Trading Cards are now available for dropping so get in game and start collecting those cards!. Follow me on Twitter! : If Incandescent is your kind of game follow me on Twitter for all the latest information on what I am working on next. Releasing on steam has brought in so many more fresh eyes to the game and with that, many more critical assessments of it. I want to make a better game and I am taking everything I read on board for my next game. I am going to be more open about the development of my next game and with that, should hopefully make it a better game.. Groupees bundle keys now going out! : If you were one of the people who bought the groupees bundle and helped get Incandescent greenlit, first of all thank you.. Incandescent V1.2! : OK I've done it, the turrets have been nerfed! I won't be able to fix everything wrong with the game but I have been reading the main reviews of Incandescent and I am aware of what people are liking and not liking. I will be taking this information forward to Incandescent 2 which I hope will stand more as it's own game with it's own ideas rather than a perceived copy of already established games. (Inspiration was taken of course. :P) Thanks for buying my game! Patch Notes: Nerfed the turrets. The distance they spawn from the player has now been doubled and their fire rate has been decreased. This should stop any unfair damage recived from multiple turrets spawning at the same time. Set the default resolution to 1920x1080. This change won't take effect for any player who already has a save file xml, they will still need to go into the settings to change it. Changed Leaderboard to Local Leaderboard on the main menu. This is to remove confusion around if the leaderboard was online or not. It unfortunately is not.
